Importance of ISO 22317 Security and Resilience Certification Training

- ✓ ISO 22317 is a technical specification that lays out a clear step-by-step path that organizations need to follow in order to create a solid Business Impact Analysis (BIA) process. It is the responsibility of the organizations to establish a BIA process that would give them insights into a matter that would complement their own risk profile. Professionals with ISO 22317 BIA Certificate have an understanding of Business Continuity Management System. They help companies create and manage a documented Business Impact Analysis (BIA) process. Their improved proficiency in managing business continuity renders them invaluable assets for organizations.
- ✓ Business Impact Analysis Training offers participants with the skills needed to conduct BIA in accordance with ISO 22317. It also discusses the significance of business continuity management, methodology, and BIA concepts. Our training program improves candidates' comprehension of contractual, legal, and regulatory obligations and their impact on Business Continuity requirements. They also get the ability to evaluate risks and possible impacts on business operations.

ELIGIBILITY CRITERIA

- ✓ Aspirants need not meet any requirements to pursue ISO 22317 Security and Resilience Training Course. However, having prior knowledge of the ISO standard is beneficial.

WHO SHOULD ATTEND

- ✓ Any professional who wants to advance his/her career in Security and Resilience can take up ISO 22317 Course.
