MICROSOFT CYBERSECURITY ARCHITECT EXPERT CERTIFICATION

SC 100
As per International Standards

UNICHRONE

Unichrone Training **Advantages**

- ✔ 4 Day Interactive Instructor –led Online/Classroom or Group Training

- ✔ Course study materials designed by subject matter experts

- ✔ Mock Tests to prepare in a best way

- ✔ Highly qualified, expert & accredited trainers with vast experience

- ✔ Enrich with Industry best practices and case studies and present trends

- ✔ End-to-end support via phone, mail, and chat

- ✔ Microsoft Cybersecurity Architect Expert Certificate Training Course adhered with International Standards

- ✔ Convenient Weekday/Weekend Microsoft Cybersecurity Architect Expert Certification Training Course schedule

UNICHRONE

Importance of Microsoft Cybersecurity Architect Expert Certification

✓ Microsoft Cybersecurity Architect Expert Certificate is a widely recognized credential that allows professionals to advance their careers within the field of cybersecurity. Possessing this credential proves a professional's expertise in designing and improving cybersecurity strategies for protecting an organization's goals and operational procedures throughout the enterprise architecture.

A Microsoft Certified Cybersecurity Architect Expert creates a Zero Trust strategy and architecture that incorporates security measures for infrastructure, data, apps, identity, and access control whilst evaluating security operations and governance risk compliance (GRC) technology initiatives. On the whole, having this esteemed certification would enable professionals to pursue diverse roles in their careers and stay updated with cybersecurity trends.

About Unichrone

✔ We are a professional training institute with an extensive portfolio of professional certification courses. Our training programs are meant for those who want to expand their horizons by acquiring professional certifications across the spectrum. We train small- and medium-sized organizations all around the world, including in USA, Canada, Australia, UK, Ireland and Germany.

ELIGIBILITY CRITERIA

✓ A candidate taking up Microsoft Cybersecurity Architect Expert Certification should have advanced experience and knowledge in a wide range of security engineering areas including identity and access, platform protection, security operations, securing data, and securing applications. In addition, they should also have experience with hybrid and cloud implementations. Furthermore, before attempting SC 100 Exam, candidates must pass one of the following exams: SC-200, SC-300, AZ-500, or MS-500.

Why attend Microsoft Cybersecurity Architect Expert Training?

✓ At Unichrone, Microsoft Cybersecurity Architect Training is conducted by highly qualified trainers. Candidates who complete this course will be equipped with the knowledge and skills necessary to build and assess cybersecurity strategies in the following domains: data and apps, governance risk compliance (GRC), security operations (SecOps), and zero trust. Our training course covers SC 100 Exam content allowing candidates to prepare for the exam and craft the path to being certified as a Microsoft Cybersecurity Architect Expert.
