ELIGIBILITY CRITERIA

- ✓ Candidates are required to have a strong sense of Microsoft 365 Services. Without having such adequate expertise, candidates might find it difficult to understand the fundamentals of Microsoft 365 Information Protection Services and its technical implementation.

Why attend **Microsoft Information Protection Administrator Training**?

- ✓ Individuals who attend the Microsoft Information Protection Administrator Training offered by Unichrone are equipped with the knowledge and abilities to utilize Microsoft information protection solutions for safeguarding data in an organization. During this training session, candidates will be introduced to the nuances of controlling the business to meet regulatory requirements. In addition, trainees understand the technicalities of creating pertinent criteria and assess IT operations and procedures in accordance with guidelines. Professionals will be further able to develop guidelines and standards for governance, protection, data loss prevention, and content classification at the end of the program.
